Vimarsh Srivastava

Software Engineer — Full Stack Developer — AI Enthusiast

Lucknow, India • +91 9118694244 • vimarshadarsh@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in scalable Full-Stack development (MERN) and AI integrations (LLMs). Expertise in architecting REST APIs, secure JWT authentication, and building intelligent web apps. Backed by a strong foundation in Data Structures & Algorithms (250+ LeetCode) and Agile CI/CD workflows, with a proven track record of optimizing backend performance, deploying cloud solutions, and delivering highly responsive, user-centric software.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, SQL
- **Web Technologies:** React.js, Node.js, Express.js, Tailwind CSS, REST APIs
- **Databases & Cloud:** MongoDB, PostgreSQL, Supabase, Vercel, Docker
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Computer Networks
- **Tools & Practices:** Git, GitHub, CI/CD, Postman, Agile/Scrum, JWT Authentication

WORK EXPERIENCE

Full Stack Web Development Intern **Aug 2025 – Nov 2025**

Unified Mentor (Remote) *Training & Project Program*

- Built 3 full-stack web applications using the MERN stack, implementing scalable backend architecture, database design, and modular API development.
- Developed and integrated 5+ RESTful APIs for CRUD operations, authentication, and business logic, enabling seamless frontend-backend communication.
- Implemented JWT-based authentication and role-based authorization to secure protected resources and application workflows.
- Applied Git/GitHub-based version control, debugging, and deployment practices while delivering assigned projects in a collaborative development environment.

PROJECTS

AI Mock Interview Platform *Next.js, TypeScript, Supabase, Gemini API, Tailwind CSS*

- Architected a full-stack AI technical interview platform using Next.js/TypeScript, simulating realistic environments across software domains.
- Integrated the Gemini LLM API for dynamic, role-based question generation and real-time feedback using targeted prompt engineering.
- Provisioned a PostgreSQL database via Supabase for analytics, paired with a responsive Tailwind CSS frontend deployed on Vercel.

NotesGen AI *React.js, Node.js, Express.js, MongoDB, OpenAI API*

- Developed an intelligent study platform seamlessly integrating the OpenAI API for automated text summarization and semantic extraction.
- Engineered robust backend microservices to process 1,000+ words of raw material into structured notes, reducing manual study time by 60%.

Real-Time Chat Application *React.js, Node.js, Express.js, MongoDB, WebSockets*

- Engineered a scalable messaging application leveraging Node.js and WebSockets, supporting bi-directional communication for 50+ users.
- Designed a persistent NoSQL data schema in MongoDB for efficient message storage, alongside robust session-based user authentication.
- Integrated Cloudinary-based media handling to support image sharing while maintaining lightweight database storage and efficient content delivery.

ACHIEVEMENTS

- **Smart India Hackathon (2024):** Conceptualized and delivered a production-ready software prototype in 36 hours at Smart India Hackathon, securing 3rd place among 20+ competing teams.
- **Algorithmic Problem Solving:** Tackled over 250 DSA problems on LeetCode, solidifying a strong foundation in essential data structures and algorithms for efficient software design.

EDUCATION

B.Tech in Computer Science and Engineering **Aug 2023 – May 2027**

Shri Ramswaroop Memorial University, Lucknow, India

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP
